📍 Bangalore, Karnataka 📞 +91 7619415101 ✉ vbr1058@gmail.com 🔗 [linkedin.com/in/vinay-b-r](https://www.linkedin.com/in/vinay-b-r) 📁 [Portfolio](#)

AI Quality Engineer — Testing AI Agents & Autonomous Systems — Senior SDET @OpenText — ex-redBus (MMT) — LLM Evaluation — Prompt Engineering — Java/Python — CI/CD

SUMMARY

AI Quality Engineer with **4 years of experience** in automation testing, software development, and **testing AI agents & LLM-powered systems** — ensuring they behave reliably, accurately, and safely in production. I bring a rare dual perspective: I understand how systems are **built** and how they **break**. Open to collaborations on AI agent testing, LLM evaluation, and intelligent automation.

SKILLS & FOCUS AREAS

Programming: Java, Python, SQL

Automation & Testing: Selenium, Playwright, Appium, TestNG, JUnit, RestAssured, Postman, JMeter, k6, Selenium Grid

Backend & APIs: FastAPI, Flask, Streamlit, REST API Development

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Cloud: Git, CI/CD, Docker, Jenkins, AWS, GCP, Microservices, Kafka, RabbitMQ

AI Agent Testing & LLMs: AI Agent Evaluation, LLM Output Validation, Hallucination Testing, RAG Pipeline Testing, Prompt Engineering (CoT, Few-shot, Zero-shot), Function Calling, Embedding Models

AI Tools & Frameworks: OpenAI API (GPT-4o, GPT-4-turbo), Claude Sonnet, Gemini, LLaMA, LangChain, n8n, GitHub Copilot, Cursor

Tools: JIRA, Confluence, Log4j, Extent Reports

Focus Areas: Testing AI Agents & Autonomous Systems · LLM Evaluation (Hallucination Detection, Output Accuracy, Tool-Use Reliability) · RAG Pipeline & Prompt Chain Validation · Agentic Decision Loop Testing · AI-Driven QA & Intelligent Test Generation · CI/CD Optimization

EXPERIENCE

OpenText

Aug 2025 – Present

Senior SDET (AI Quality Engineer)

Bangalore, KA

- Architected and delivered a **production-grade end-to-end test framework** within **4 days**, fully integrated with CI/CD pipelines — recognized with the **Best QA Award**.
- Designed scalable evaluation frameworks for **testing AI agents and autonomous systems**, covering output accuracy, hallucination detection, tool-use reliability, and edge-case behavior.
- Built AI-assisted testing workflows using **Claude, GitHub Copilot, and Cursor**, accelerating test generation, code review, and debugging speed significantly.
- Integrated AI model output validation (OpenAI, Claude, Gemini) into **CI/CD quality gates** for continuous LLM quality assurance.
- Designed frameworks for testing **complex microservices architectures** and AI-driven system behaviors at scale.

RedBus (MakeMyTrip Group)

2022 – Aug 2025

SDET (Automation, API & AI-Driven Testing)

Bangalore, KA

- Built an internal **LLM-powered test case generator** using prompt engineering, accelerating test creation by **40%** and improving coverage quality.
- Implemented **n8n workflow automation** for **Auto Bug Creation with Smart Filtering**, reducing manual triage effort and streamlining defect management.
- Designed and deployed **Test Data Management automation pipelines** using n8n, enabling on-demand provisioning and cleanup across environments.
- Optimized Jenkins-based CI/CD pipelines with **Dockerized test environments**, reducing deployment time by **50%** and achieving a **95% reduction** in manual intervention.
- Engineered scalable **parallel execution frameworks** using Selenium Grid, reducing regression suite runtime by **60%**.
- Developed **REST API testing frameworks** using Postman and RestAssured, achieving **100% sanity coverage** and reducing production API defects by **50%**.
- Built **end-to-end mobile automation test suites** with Appium, enabling cross-device testing with **100% sanity coverage** across major devices.
- Implemented **performance and load testing** using k6 for stress validation of critical services.
- Verified **asynchronous messaging workflows** via Kafka and RabbitMQ, ensuring **100% message integrity** in distributed systems.
- Recognized with **Technology Excellence Award** for AI innovation on **RailBot 2.0**.

Mindtree

2021 – 2022

Software Engineer

Bangalore, KA

- Revamped Jenkins-based CI/CD pipelines by optimizing Docker layer caching and parallelizing test stages, reducing time-to-production by **30%**.

EDUCATION

Dayananda Sagar College of Engineering
B.E. in Electronics and Instrumentation Engineering, GPA: 9.10/10.0

2017 – 2021
Bangalore, Karnataka

Indira Pre-University College
Percentage: 84%

2015 – 2017
Tumkur, Karnataka

LEADERSHIP & AWARDS

- Best QA Award – OpenText: Designed and delivered a complete test framework with full CI/CD integration within 4 days.
- Technology Excellence Award – RedBus: Recognized for AI innovation with RailBot 2.0, demonstrating cutting-edge application of AI/ML in test automation.
- CI/CD Excellence – Mindtree: Reduced time-to-production by 30% through Jenkins CI/CD optimization and Docker layer caching.
